

TAMPA BAY AUTOMOBILE MUSEUM

We recently purchased this car in Europe and we would like your assistance in uncovering its history.

According to the photos (the car is still in transit from Europe), the chassis shares characteristics with a Miller FWD from the nineteen twenties.

The engine is Ford model A with a "Cyclone Roof Racing" head and Winfield carburetors. The gear box and differential should be Ford components.

Any and all information is welcome.

We operate a small museum (www.tbauto.org) and we have an extensive collection of early FWD automobiles including models from Alvis, Cord, Ruxton, Tracta, and many more.

We thank you for your help.
